Experience

Codersh Web Services

Frontend Developer

Jul 2024 – Present

Ahmedabad, Gujarat

- Develop and maintain responsive, production-ready websites using HTML, CSS, JavaScript, React.js, and WordPress based on client and project requirements.
- Develop and customize WordPress websites using Elementor, Advanced Custom Fields (ACF), Custom Post Types (CPT), WooCommerce, and commonly used WordPress plugins.
- Build dynamic and structured content-driven websites using ACF and CPT, enabling flexible content management for different business requirements.
- Develop and maintain e-commerce websites using WooCommerce, including product management, online store functionality, and responsive e-commerce interfaces.
- Develop responsive frontend interfaces and reusable UI components using React.js, HTML, CSS, JavaScript, and Bootstrap.
- Work with Headless WordPress architecture using WordPress as a CMS and React.js or Next.js as the frontend for dynamic content delivery.
- Develop and customize business websites, content-driven websites, landing pages, service pages, and e-commerce websites with a focus on responsive design and user experience.
- Perform website debugging, bug fixing, cross-browser testing, responsive UI improvements, content updates, and ongoing website maintenance.

Project Experience

- **React.js and WordPress:** Developed responsive business and content-driven websites using React.js and WordPress, focusing on reusable UI components, responsive layouts, and user-friendly interfaces.
- **Next.js and Headless WordPress:** Developed Headless WordPress websites using Next.js as the frontend and WordPress as the CMS, integrating dynamic content and building responsive frontend interfaces.
- **WooCommerce:** Worked on WordPress-based e-commerce websites using WooCommerce, including product management, online store functionality, and responsive e-commerce interfaces.
- **Elementor:** Built and customized professional business websites, landing pages, service pages, and responsive layouts using Elementor according to project requirements.
- **ACF and Custom Post Types:** Developed dynamic and content-driven WordPress websites using Advanced Custom Fields (ACF) and Custom Post Types (CPT) to create structured and flexible content management systems.
- **WordPress Plugins:** Integrated and configured commonly used WordPress plugins to add required functionality and improve website features based on project requirements.
- **Responsive Web Development:** Created responsive websites and user interfaces optimized for desktop, tablet, and mobile devices using HTML5, CSS3, JavaScript, Bootstrap, and modern frontend development practices.

Internship

Q-Spiders

6 Months

Full Stack Development Intern

Ahmedabad, Gujarat

- Completed a 6-month Full Stack Development internship with practical training in frontend development, basic backend concepts, database fundamentals, and web application development.
- Learned frontend development fundamentals using HTML, CSS, JavaScript, and responsive web development concepts for building user-friendly web interfaces.
- Gained foundational knowledge of Core Java and Object-Oriented Programming (OOP), with basic exposure to JDBC, Servlets, and JSP.
- Gained basic understanding of SQL databases, database connectivity, CRUD operations, and Hibernate ORM during the training program.
